DETAILED ACTION

1. Claims 1-78 are allowed.

Drawings

2. The drawings filed on March 17, 2004 are accepted by the Examiner.

REASONS FOR ALLOWANCE

3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "a detector that detects a recording medium to be positioned to be set in an accessible state; a recording-medium starting section that activates the recording medium detected by said detector to activate the accessible state; and a computer software program starting section that performs an authentication check on said recording medium activated by the recording-medium starting section, reads a computer software program from said recording medium only when a result of the authentication check is normal, and starts an execution of said computer software program" as recited in independent claim 1 and similarly recited in independent claims 10, 19, 39, and 40 .

As per claim 42, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "producing license information using at least identification information of said recording medium; and recording the license information produced by the producing step and the computer software starting program on said recording medium" and similarly recited in independent claims 54, 60, 61, 68, 69, and 72.

As per claim 62, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "a sending section that sends the license information produced by the license information creation section and the computer software program for starting the information processing apparatus to a recording section that records the license information produced by the license information creation section and the computer software program for starting the information processing apparatus on the starting recording medium" and similarly recited in independent claims 63, 66, 67, and 71 .

As per claim 64, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "an updating program creation section that produces an updating computer software program that updates the computer software program which causes said information processing apparatus to start using at least identification information of said information processing apparatus" and similarly recited in independent claims 65, 70, and 76.

The remaining claims are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
